I am a developer that is always looking for an opportunity for growth; I currently have experience with Front-end development, UI/UX, and working remotely.

PROJECTS

Grammar Bot [Code](#) | [Website](#)

- A React js website that takes in text, checks for grammar errors, and then it returns all the errors and possible solutions.
- Created with React js, Grammarbot api, React-router, HTML5, CSS3, Javascript, and Material-ui.
- The challenging part of making this website was that the documentation on the api was limited. Due to this I realized the importance of the console log.

Bali Resort [Code](#) | [Website](#)

- A React js landing page for a mock resort, showing the locations and some basic details for each branch using a map api.
- Created with React js, Mapbox api, React-router, HTML5, CSS3, and Javascript.
